Our theme for the June Session was to produce a creative black and white photo. It was obvious from our Show & Tell display that everyone had put a lot of thought into being CREATIVE. The 3 photos above are an indication of the amazing work that was produced. We appreciated Ken's very positive appraisal of our photos.

For this session, Bob gave us an in depth informative presentation of how to enhance and further develop photos in computer programmes. He showed that this need not be as daunting as it sounds. Members listened intently and without a doubt learned a great deal. Thank you Bob for your well presented tutorial.

WE ARE HOPING THAT DARREN WILL BE BACK FOR MACRO PHOTOGRAPHY-20TH JULY
